The **BROWNIE** TWO VALVER

*The Set that sets
the Standard
for 1933*

**at a price
you can
afford**

- ¶ We would like to assure all purchasers of the Brownie 2-Valve Receiver that the guarantee of the Brownie Wireless Co. of Great Britain Ltd. stands behind it.
- ¶ Never before has a Receiver of such outstanding merit been offered at the astonishingly low price of 60/-.
- ¶ Alternative programme reception will be available to the most inexperienced user. It is not possible to print all the numerous testimonials we have received, but the few reproduced in this brochure are ample proof that our confidence in the Receiver is fully justified.
- ¶ Your dealer will be pleased to arrange a demonstration and inspection of the construction of the Receiver, with its all-steel chassis, which will convince you that the Brownie 2-Valver stands for reliability, quality and performance.

A FEW OF THE HUNDREDS OF UNSOLICITED TESTIMONIALS FROM DELIGHTED USERS.

Croydon.
"Will you please send me a copy of your booklet, 'Searching the Ether,' which contains some useful hints on reception. I possess your latest 2-Valve Brownie Battery Receiver, and no doubt you will be interested to know how it behaves in this district. Appended is log of stations received on indifferent aerial 50 ft. in length, and I have only mentioned those stations to be depended upon."
"I am more than pleased with the appearance and tone of the set, and feel sure you have produced just the article to please many thousands of people like myself who desire a good little set, simple to operate, at a more than reasonable price."
A. E. W.

Brondesbury, N.W.6.
"I have just had the pleasure of listening to the Brownie 2-Valve Set. I am more than delighted with the perfect tone and quality . . . far better than many bigger and more expensive sets I have heard. Both the Regional stations were received with perfect clarity without interference."
"The set is very neat in appearance, compact, and in my opinion is the finest value in wireless to-day."
"We have been listening to speech, orchestral concerts, piano-forte recital and records. It is simple to work and delightful to listen to."
R. R.

Carshalton.
"I have one of your new 2-Valve Battery Receivers. I must say that I was agreeably surprised with the results, the volume being equal to many 3-valve sets I have heard. In addition, the tone of the speaker was excellent. The selectivity was good and the London twin transmitters could be easily separated when the least selective aerial tapping was used."
"Muhlacker, the German station, which is so close to the London Regional, could be obtained without interference. The latter is, I think, quite a feat with a 2-valve receiver, which, all round, is a first-class job."
F. C.

Whitley Bay.
"On Aerial 2, Newcastle was very good. Other stations also came in very well. These include the National, North Regional, Midland Regional, London Regional and Radio Paris."
"The tone of the loudspeaker was also excellent."
H. W. N.

ALL STEEL CHASSIS . . .

The life and reliability of a building depends to a very great extent on the foundations on which it is built. The same principle applies to a Radio Receiver . . . that is why we use an All-Steel Chassis in the Brownie 2-Valve Receiver . . . A SURE FOUNDATION . . . STEEL FOR RELIABILITY.

LOUD-SPEAKER BUILT IN . . .

The Loudspeaker which is incorporated in the Brownie 2-Valver has been specially selected to match the high quality components which are used in the circuit. It ensures a quality of reproduction that will please the most critical ear, considerable volume being assured without the slightest trace of distortion.

HIGHEST CLASS COMPONENTS 100% BRITISH

No effort has been spared to make the Brownie 2-Valver the finest Receiver of its kind. Every component is subjected to exhaustive tests before being assembled in the Receiver, so that 100% perfection both in performance and quality is assured. It is entirely British-made, and built entirely of British components . . . Hear the Receiver in operation . . . and you will buy!

PERFORMANCE THAT AMAZES EXPERTS YET SO SIMPLE IN ITS OPERATION

The remarkable performance of this low-priced Receiver is assured by the infinite care taken in the testing of the different components and the very thorough broadcast tests to which the Receiver is subjected when completed. The pleasing tone of the reception is due to the carefully selected loudspeaker, which is built in the handsome solid oak cabinet. The performance, range, tone and volume positively amaze the experts. The Receiver has been tested in districts all over the British Isles, and reports have been astonishing in their appreciation of the value and performance of the Receiver.

It does not need an expert to get results right away; it is so simple that a child can operate it. All you have to do is to switch on, turn the controls and hear the programmes come singing through with all the brilliance of the original performance. All the controls are conveniently placed at the top of the cabinet.

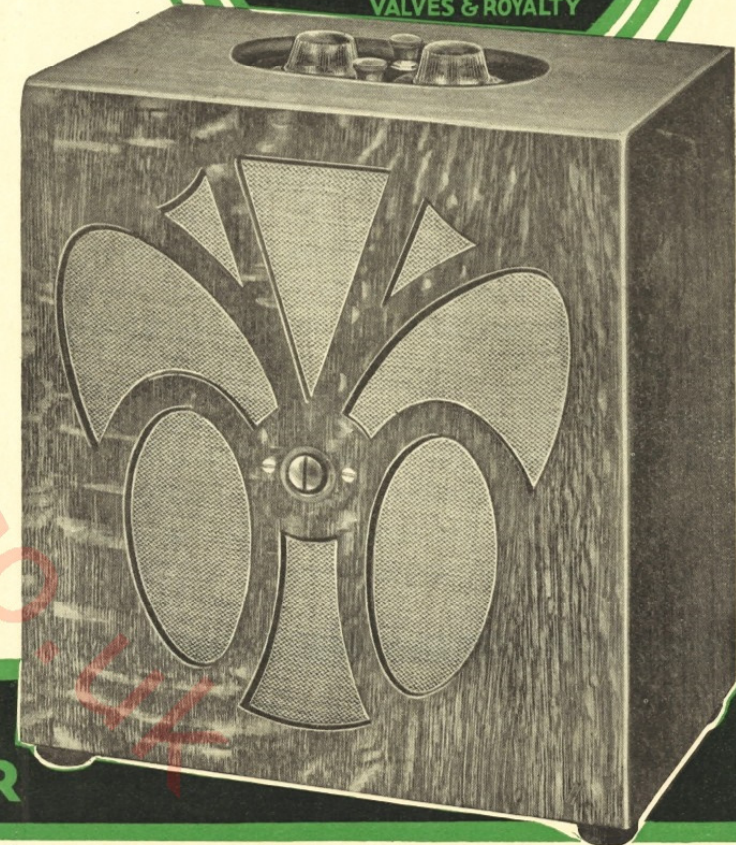

All-Steel Chassis—
Built-in Loudspeaker
of Exceptional Tone
—Solid Figured Oak
Cabinet.

B.R.V.M.A. Detector and
Power Valves—2 aerial
tappings for the required
degree of selectivity,
according to aerial length
and location—a wave-
length range of 200—500
and 900—2,000 metres—
accommodation for all
batteries inside the cabi-
net—100% British.

CABINET HOUSES ALL BATTERIES

The cabinet of the Brownie 2-Valve Receiver is constructed of solid oak which has been thoroughly seasoned, and is the finest quality obtainable. Accommodation is provided inside the cabinet for all the batteries used in the operation of the Receiver, so that it is entirely self-contained. There are no trailing wires with the Brownie 2-Valver.
