D.C. MINOR and 95

MOVING-COIL **SPEAKERS**

A full-toned Speaker Ideal for self-contained table sets and radio-gramophones of moderate power. With specially prepared diaphragm, giving remarkable sensitivity and natural full-toned reproduction Undoubtedly the finest "midget" Speaker it is possible to design. Suitable for working from power or pentode output valves. Ultra DC Minor for D.C. Mains (200/250 v.)

Chassis with Input Transformer

A superb Moving-Coil Speaker that requires no field excitation, employing instead a heavy permanent magnet of Vickers' cobalt steel. Gives amazing tone and volume. Sufficiently sensitive to work from the smallest receiver but fully capable of handling the strongest signals without distortion. For power or pentode output valves.
