ZETAVOX
LONG DISTANCE AUTOMATIC RADIO

ZETAVOX

PROCLAIMS A NEW ERA IN RADIO!

ONCE listeners marvelled at the mere hearing of sounds from the air. The tune lay in the wonder of hearing this "music", **any** kind of sound, without any physical connection with its source. Mystery intrigued people into buying radio receivers.

THEN radio changed it was no longer a mystery it had become a closer approach to reality, which held enthusiasts and made new ones.

NEVERTHELESS, until the advent of the 1933 ZETAVOX Models and "TONE-TOTALITY", Radio reception was short of perfection.

NOW ZETAVOX, through "TONE-TOTALITY", attains that hardest sought aim of the radio engineer reception in every detail, the equal of the original broadcast.

THE TONE quality of the actual voice or instrument before the microphone cannot be improved and ZETAVOX "TONE-TOTALITY", leaving NOTHING unheard, is twin to Broadcasting itself.

ZETAVOX

LONG DISTANCE AUTOMATIC RADIO

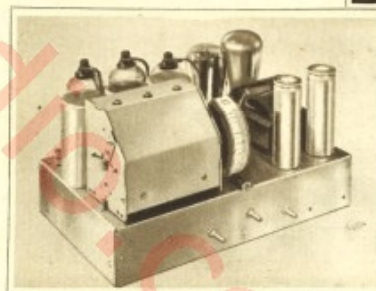

5-VALVE TABLE MODEL A.T.

A handsome table receiver in beautifully veneered walnut. Set and Speaker are both housed in the cabinet.

The chassis of this receiver is completely shielded and 3 tuned circuits are employed. The following valves are incorporated :

- 2 Variable-Mu screen grids

ZETAVOX

HAS AUTOMATIC TUNING

PRESS THE BUTTON—

THERE'S YOUR STATION!

— the realisation of the dream of every radio owner. No logging—no tuning—no annoying breaks or halts whilst tuning the desired station.

YOU yourself, in your own home, set the automatic device for your nine favourite stations—a moment's work after that all you do is to press the button for the station you want.

THE comfort and advantages of an automatic tuner must be right under one's finger tips to really know what Automatic Tuning is.

THIS Tuner does not interfere with ordinary dial-tuning, so quite apart from the stations for which the tuner is utilised, as many other stations as you like can be tuned in.

THIS Tuner has a great advantage over every other tuning device as in the event of the wavelength of any station being changed, it requires only a moment's work to adjust a ZETAVOX AUTOMATIC TUNER—then you forget all about the change.

ZETAVOX**8-VALVE SUPER-HETERODYNES****5-VALVE CONSOLE MODEL A.P.T.****AUTOMATIC TUNING!****PRESS A BUTTON—****THERE'S YOUR STATION****CABINET :**

A richly grained console of veneered walnut.

ALL that Radio Science has hitherto accomplished all that Radio craftsmanship has hitherto perfected is excelled in the ZETAVOX super-heterodyne.

CIRCUIT. A very advanced Super-heterodyne circuit employing double Band-Pass tuning and embodying eight tuned circuits, with single knob control. The chassis is completely shielded. The following valves are incorporated : 2 Variable-Mu Screened Grids, 2 Detector Screen Grids, Pentode Output, Triode Oscillator, Triode Automatic Volume Control and Rectifier.

CONTROLS. (1) Wave change and Gramophone switch. (2) Single Knob tuner. (3) Volume Control and on-and-off switch. Only three controls, thus making the operation of this receiver exceedingly simple.

AERIAL. A self-contained aerial is provided with which local and powerful foreign stations can be received without the use of an external aerial or earth.

TUNING. The dial is illuminated and calibrated in metres, the wave-length ranges are 200/550 and 1,000/2,000 metres.

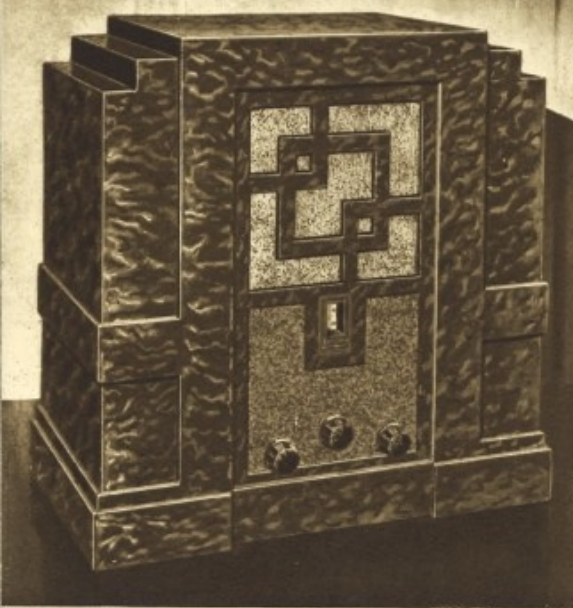

SPEAKER. A mains energised Moving Coil Speaker is fitted. Provision is made for the use of additional speakers.

GRAMOPHONE. Connections are provided for the use of a Pick-up.

PERFECT AUTOMATIC VOLUME CONTROL.

Automatic Volume Control, so often a misused term, becomes a reality in the ZETAVOX SUPER-HETERODYNE. Once you have set the volume control at the exact volume you desire, that IDENTICAL volume will prevail on any station you tune in and with Automatic Volume Control comes the practical elimination of fading, that annoying dying-away of volume that too often accompanies distant reception.

8-VALVE SUPER-HET MODEL S. T.

CABINET :

A particularly pleasing cabinet of distinctly modern design is provided, built of finest quality Bakelite finished in handsome figured walnut shade.

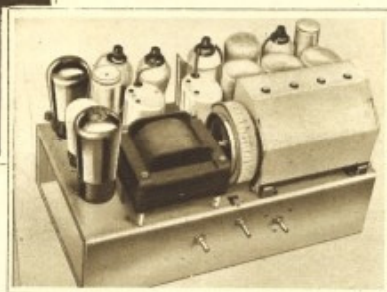

CHASSIS :

The standard Zetavox 8-valve super-het chassis, as described on page 7, is incorporated.

DIMENSIONS :

17½" × 17½" × 9½"

The owner of this set will very quickly realize that he has a receiver which, for its beautiful tone and amazing range and selectivity, has no equal.
